AGENDA
Regular Meeting and PUBLIC HEARING
September 11, 2019

The meeting packet may be found on the Commission’s website: http://elmcreekwatershed.org/minutes--meeting-packets.html

1. Call Regular Meeting to Order.
   a. Approve Agenda.*

2. Consent Agenda.
   a. Minutes last Meeting.*
   b. Treasurer’s Report and Claims.*

3. Open Forum.
   a. Weaver Lake Conservation Association.*

Suspend meeting

4. Public Hearing for Capital Improvement Projects
   a. Project 2019-01: Rush Creek Main Stem Stabilization Phase 3, Maple Grove;
   b. Project 2019-02: Ranchview Wetland Restoration, Maple Grove;
   c. Project 2019-04: Hickory Drive Stormwater Improvement, Medina;
   d. Project 2019-05: Downtown Regional Stormwater Pond, Corcoran; and
   e. Project 2019-06: Elm Creek Stream Restoration Phase IV, Champlin.
      a. Staff Report.*
      b. Updated CIP.*
      c. Legal Notice.*
      d. Feasibility Reports* - attached to cooperative agreements.
      e. Commission discussion.
      f. Open Public Hearing.
          1) Receive comments from member cities.
          2) Receive comments from public.
      g. Close public hearing.
      h. Commission discussion.
      i. Consider Resolution 2019-03 Ordering 2019 Improvement Projects.*
      j. Approve Cooperative Agreements* with cities of Champlin, Corcoran, Maple Grove (2),
         and Medina.
      k. Letter certifying Levy to County.*

Resume meeting

5. Action Items.

Boston Scientific Weaver Lake Road Building 2 East Addition

Maple Grove
Project #2019-024

Project Overview: Boston Scientific is proposing to build a two-story addition on the east side of their existing building #2 to provide production and office space. The project will entail moving the existing service drive and site utilities to the east side of Building #2. It will disturb 2.1 acres and create an additional 1.06 acres of new impervious areas. This will trigger review of the site plans for conformance to Rule D (Stormwater Management) and Rule E (Erosion and Sediment Control)

Applicant: Boston Scientific, Attention Brendan Collins, 1 Scimed Place, Maple Grove, MN 55311. Phone: 763-494-1737. Email: Brendan.collins@bsci.com.

Agent: HGA Architects & Engineers, Attention Kenny Horns, 420 N 5th St., Suite 100, Minneapolis, MN 55401. Phone: 612-578-4380. Email: khorns@hga.com

Exhibits:
1) Elm Creek Watershed Management Commission Request for Plan Review and Approval received July 29, 2019 with application fee of $575.00.
3) Ramsey-Washington reuse calculator for 3.1 acres irrigation area on site.
   a. Sheet C001, Civil Notes and Legends
   b. Sheet C002, General Site Plan
   c. Sheet C100, Stormwater Pollution Prevention Plan Narrative
   d. Sheet C101 & C102, Erosion and Sediment Control Plan and Detail
   e. Sheet C200, Site Demolition Plan
   f. Sheet C300, Site Layout and Surfacing Plan
   g. Sheet C400, Site Grading Plan
   h. Sheet C500, Site Utility Plan
   i. Sheet C501 & C900, Sewer Structure and Details.
Findings:

1) A complete application was received August 2, 2019. The initial 60-day decision period per MN Statute 15.99 expires October 1, 2019.

2) The project work will consist of constructing a two-story addition on the east side of Building 2 at their Maple Grove facility. There will be approximately 1.9 acres of disturbance and 1.06 acres of new impervious areas created by this work.

3) The applicant proposes to utilize extra capacity in their existing pond to meet the Commissions rate, TP and TSS controls. In addition, they propose reuse of the runoff water for landscape irrigation to meet the Commissions abstraction requirements.

4) No wetland or floodplain impacts are proposed.

5) Construction erosion and sediment controls consist of silt fence, storm sewer inlet protections and rock construction entrance/exit. Restoration will consist of new inlet protections, erosion control blankets, temporary and permanent seeding/mulching and permanent rock check dams. These items meet the Commission’s erosion control requirements.

Stormwater Management

6) Rate controls will meet the Commission’s based on the stormwater management plans previously approved by the Commission. Boston Scientific completed an expansion to an existing stormwater pond in 2005. The ultimate land use treatment/management system approved for this expansion is for a watershed area of 43.4 acres and an impervious area of 66.5% (33.1 acres). With this proposal, the watershed area is 43.4 acres with an impervious area of 64% (28.1 acres).

<td>32.4</td>
</tr>
<tr>
<td>Rates with WL2 Addition*</td>
<td>1.6</td>
<td>10.6</td>
<td>31.6</td>
</tr>
</tbody>
</table>

* Note; these rate controls are determined from TP-40 data, not the current Atlas 14 data.

7) Abstraction requirements were not part of the watersheds requirements in 2005. With this expansion, the applicant must provide for these requirements on the new impervious area of 1.06 acres per the Commissions updated stormwater management plan.
   a. To meet our requirements, the applicant proposes to expand irrigation from the stormwater pond to irrigate an additional 3.1 acres of their property.
   b. Abstraction required for the new impervious area of 1.06 acres will be 4,233 cubic feet.
   c. Based on the Ramsey-Washington Metro Watershed District irrigation calculator, the actual abstraction credits available from irrigation will be 4,285 cubic feet. This will meet the Commission requirements.

8) Phosphorus and TSS requirements are assumed to be met by the existing stormwater management plan up to the ultimate build-out of the original assumptions on site (66.5% impervious area). At the time of the original review the Commission required > 60% pond treatment efficiency and post-development loads less than or equal to pre-development loads. These requirements are still the same today.
**Recommendation:**
Approval contingent upon

1) A site plan that provides the irrigation areas to be irrigated by the new system
2) An operation and maintenance plan for the irrigation system that is approved by the City and Watershed and recorded on the land title.

Note; if the applicant wishes to proceed with grading before the Commission’s decision (expected at their next meeting on September 11, 2019), they may do so contingent upon;

1) The applicant assuming any and all risks associated with changes to the site plans necessary to comply with the Commission’s decision, and
2) The applicant receives the appropriate permits from the City of Maple Grove.

Hennepin County

[Signature]

September 11, 2019
Note; this plan only provides for 1.2 acres of new irrigation. A plan showing a total of 3.1 acres or more of irrigation is required for Commission approvals.
